

ECHOSNACK DELAY

Quickstart Cheat Sheet

Quick Tips

- **Install & Authorize** – run the installer, pop in your licence key (three seats)
- **Resize the UI** – click the top-left screw for Large ▶ Medium ▶ Small
- **Hide the Cartoon** – click the top-right screw if you need to focus on the dials

TIME

Dial delay lengths in MS or Subdivision. Click “Sync” to lock to your DAW’s bpm

REPEATS

Increase to add number of repeats. Above 80 % may go infinite

MUTATE

Amount of random modulated applied to “Mutate Enabled” parameters

Knob Modes

Double-click any knob with a round LED

White LED – Static

Stays exactly where you put it—perfect for clean, clock-work repeats

Green LED – Mutate

The value wanders, steered by the big green Mutate knob

Orange LED – Sync

Locks to your DAW's tempo.

(Only Mod-Rate knobs can go orange)

Handy Tricks & Fixes

- Runaway feedback? Drop Repeats below 75 % or tighten the filters
- CPU spike? Click the top-right screw to hide the animation
- Need chorus only? Set Repeats to 0 %, Time 0 ms, chorus depth up and dial rate to taste
- Pitch drift too wild? Turn Mutate down or switch key LEDs back to white
- Long pads, infinite tail: Sync Time to dotted ½ notes, Repeats ≈ 85 %, Filters drifting

Shortcuts & Gestures

- Alt/Option-click any control – reset to default
- Scroll-wheel (or Ctrl-drag on Windows) – fine moves
- Double-click value pop-up (sliders) – type an exact number
